Business Question:

cities by revenue in the last quarter

Generated SQL Query:

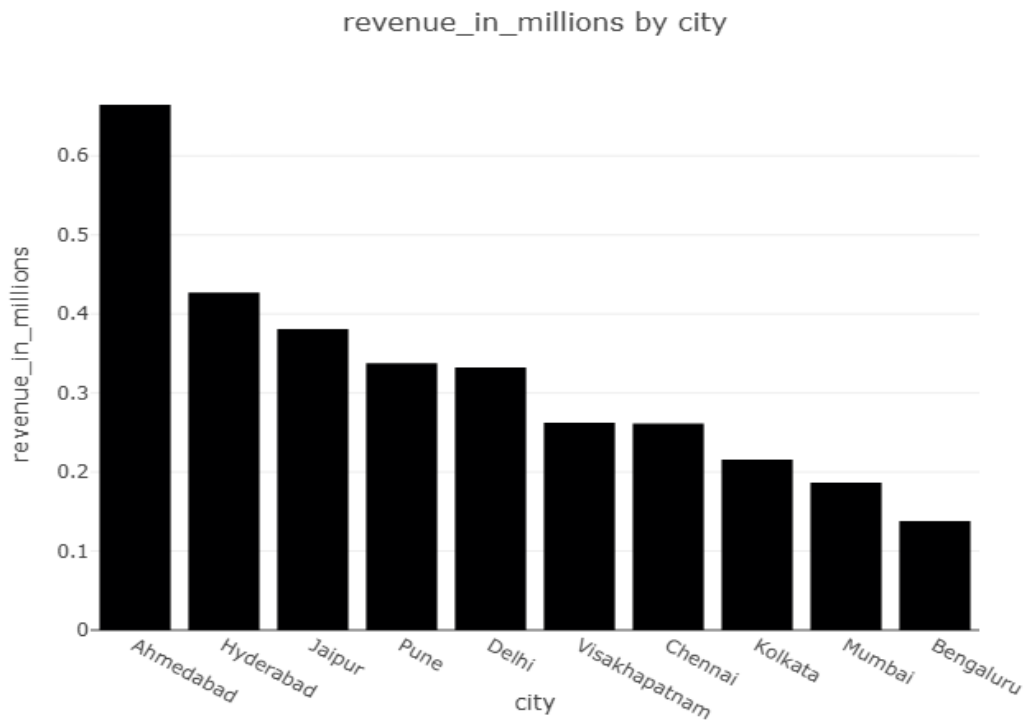

```
SELECT c.city, SUM(p.payment_amount) / 1000000.0 AS revenue_in_millions FROM payments p
JOIN customers c ON p.customer_id = c.customer_id WHERE p.payment_date >= DATEADD(quarter,
DATEDIFF(quarter, 0, GETDATE()) - 1, 0) AND p.payment_date < DATEADD(quarter,
DATEDIFF(quarter, 0, GETDATE()), 0) AND p.payment_status = 'Paid' GROUP BY c.city ORDER BY
revenue_in_millions DESC
```

AI Business Insights:

Key Business Insights - Cities by Revenue (Last Quarter):

1. Ahmedabad leads the revenue chart with approximately \$0.665 million, outperforming all other cities by a significant margin.
2. Hyderabad and Jaipur follow in the second and third positions, contributing \$0.427 million and \$0.381 million respectively, indicating a moderate drop after the leader.
3. Major metropolitan cities like Mumbai and Bengaluru show comparatively lower revenues (\$0.187 million and \$0.138 million), which is an anomaly given their usual market size, warranting further investigation.
4. The revenue distribution indicates a steep decline from the top-performing city to the mid-tier cities, suggesting concentration of business or market opportunities in select regions.
5. Southern cities such as Chennai and Hyderabad maintain moderate revenue levels, reinforcing their consistent market presence.
6. Overall, the data suggests potential growth opportunities in underperforming large cities and the need to analyze market dynamics contributing to Ahmedabad's strong performance.
